THIS IS UNEVALUATED INFORMATION

25X1X

The concrete roadways in the high explosives works near Böcknitz have been put back into condition during the past summer, and the buildings restored for the storage of high explosives. These are mainly 5 kg ecrasite charges, about 35 cm long and 10 cm diameter. The explosive is contained in an iron shell with recesses at both ends for screwing in the detonator. The detonators and the fuse cord (about 40 cm long) are wrapped with oil paper in watertight containers about 10 cm in diameter and 3 cm high. The containers have inscriptions in Russian. The buildings are near the locality, Book.
